# 1176LN, LA-2A, & Pultec

*Universal Audio Vintage Compressor and EQ Plug-Ins for Pro Tools | HD*

As manufacturers of vintage audio hardware products, including the 1176LN and LA-2A compressor reissues, Universal Audio is uniquely qualified to create emulations of vintage analog hardware. By physically modeling every component of an actual "golden unit," the 1176LN, LA-2A, and Pultec EQ emulations sound startlingly close to the original hardware units, while mimicking their response to different program material and settings. These plug-ins must be heard to be believed.

# RealVerb & DreamVerb

*Universal Audio Reverb Plug-Ins for Pro Tools | HD*

Featuring a wide variety of room shapes and material surfaces, RealVerb™ 5.1 offers users stunningly realistic emulations of acoustical spaces in true 5.1 surround. DreamVerb™, Universal Audio's flagship stereo reverb plug-in, adds even more room shapes and surfaces, while adding far greater control over the EQ and the dynamics of the early and late reflections via an intuitive graphical user interface. From a vibrantly dynamic room to a rich, deep cathedral, DreamVerb is the reverb you've been dreaming of.
